## PRODUCTS

### RSC

Also known as a Regular Slotted Carton, All flaps have the same length and the two outer flaps (normally the length wise flaps) are one-half the container's width, so that they meet at the center of the box when folded. This is a highly efficient design for many applications and there is very little manufacturing waste.

**MAHAVEER  
PACKAGING**

AN ISO 9001 : 2008 CERTIFIED COMPANY

### FOL

The Full overlap slotted container has flaps which are all the same length and are also equal to the width of the box. This style is very resistant to rough handling.

### HSC

A half-slotted container is a variation of the RSC with out one set off laps..

## PRODUCTS

### OLSE

In an overlap slotted container, the outer flaps extend partially across the width. This style is used to enhance the cushion in geffect top and bottom.

### FULL TELESCOPING STYLE

Two scored and slotted trays are made to fit inside one another to package items when depth is an issue and the item needs corner protection.

### 5 PANEL CORR.FOLDER

A very economical and easy to use package. Ideal for long, thin objects.

Long folders may be easily cut down to fit shorter objects.

### 1 PIECE CORR. FOLDER

More economical than a carton, and they require less storage space.

Very quick and easy to use. Also available in 'Special Style' where all flaps meet.

### CORRUGATED PARTITIONS

When using a single carton for multiple packaging

partitions separate and protect each item and increase the stacking strength of the container.

### LAMINATED INNER FORMS

Corrugated laminated inner forms provide stability and protection for heavy, irregularly

shaped items. Their construction also provides stable cushioning as well as ease of insertion into the master carton.
